Continuous Integration/
Continuous Delivery
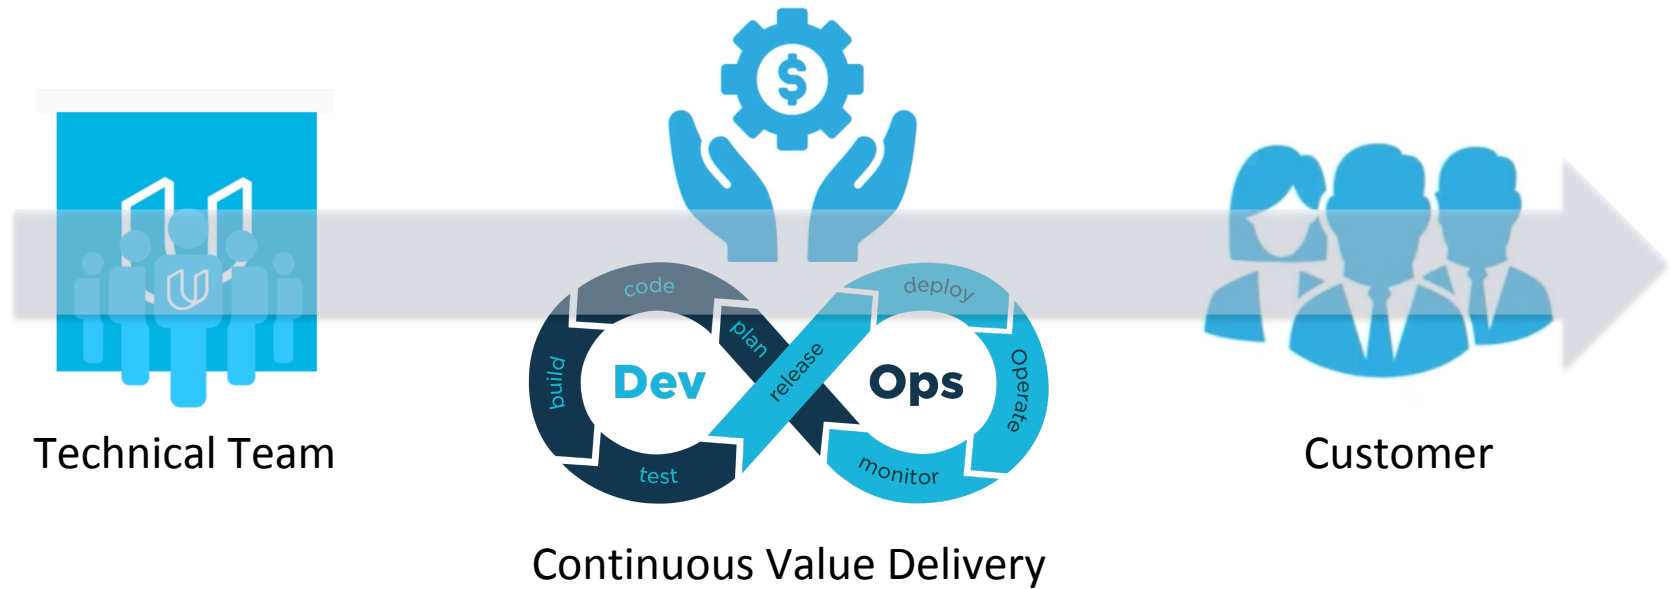

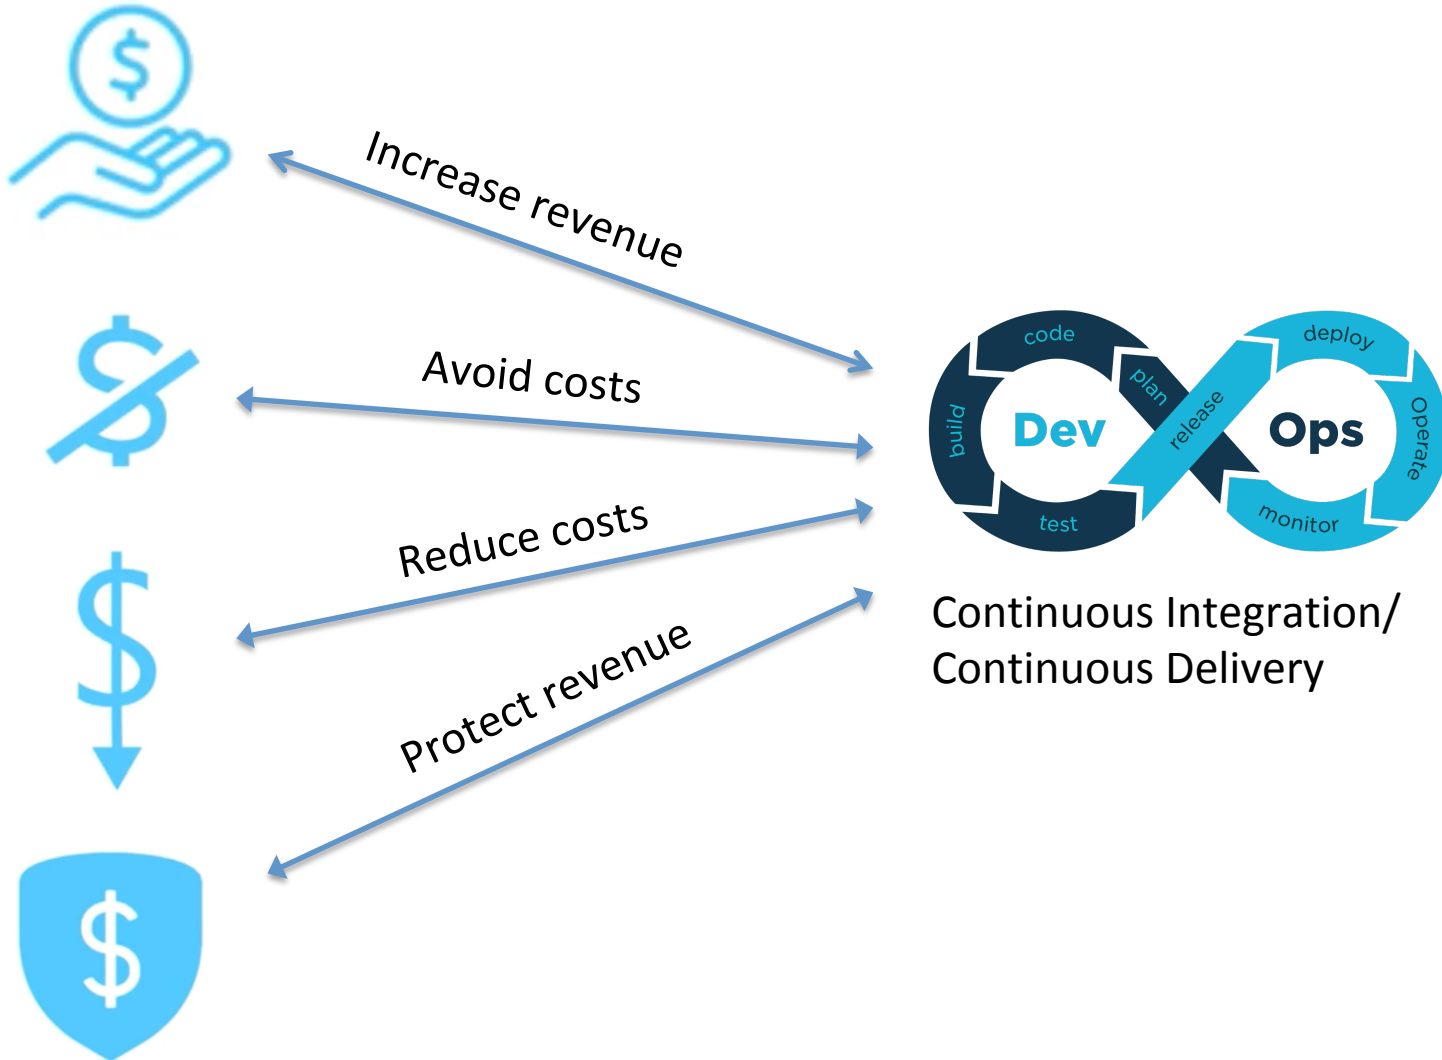

Benefits of CI/CD

- **Continuous and frequent deployment of product increments to customers**

- **Shorter cycles of product releases resulting in less time to market**

- **No manual cost related infrastructure setup through automated infrastrucutre creation**

- **Avoidance of functional software bugs through automated unit testing**

- **Reduced infrastructure costs through automated cleanup of unnecessary resources**

- **Less developer time for integration when merging multiple, functional features**

- **Increased availability of production system, through switch to fallback system**

- Reduced downtime from a deploy-related crash or major bug through automated smoke tests
